

**IT INTEGRATION**

The processes of Controller of Examinations (CoE) office are efficiently integrated with the IT systems. The institution has dedicated software for academic and examination processes. Starting from course registration to publication of results is carried out digitally, resulting in error free and faster operation.

The course registrations of students are carried out through the software. The students register their courses through the student portal. The class time tables are incorporated in the automation software by the respective faculties. The attendances of the students are posted in the software by the respective course handling faculty. The continuous internal assessments (CIA) marks also posted in the software.

The students can pay the examination fees through the software. The examination schedule is published in the automated software and students can view it using mobile application also. All schedules and important announcements are made using automated software so as to reach all stakeholders instantly.

The semester examination answer scripts are first assigned with dummy numbers through software. The examiners who evaluate the answer scripts do not know the identity of the students. After the evaluation the marks are entered in the software. The continuous internal assessment marks and End Semester examination marks are combined together for the calculation of final marks as per the regulations. The results and the analysis are completely processed by the software.

The results are published in college website and student portal. After the publication of the results, If the students apply for revaluation through software. A student, who has got pending arrears after programme completion can apply online for arrear examinations. The individual semester wise grade sheets and consolidated grade sheets are printed through software.

Academic verification of the credentials of the passed out students is also performed by the office online. Any recruiter or the student can apply online to verify the genuineness of the degree and marks. Result of verification is also communicated to the applicant online. Thus, the adoption of IT in the entire chain leads to significant advantages to students, supporting staff and faculty and ultimately to the institution
