

CRITERION 4	4.3 IT Infrastructure
Infrastructure and Learning Resources	
4.3.4 Facilities available for e-content development	

Facilities available for e-content development:

- 1. Media centre**
- 2. Audio visual centre,**
- 3. Mixing equipments and software for editing**

1. Media Centre:

Institute's Media center has facilities to record, capture, edit and upload the videos on the e-content. The open-source mixing equipment and the software are edited and uploaded on YouTube and made available for students to view and update their knowledge on the e-content related to the courses taught.

2. Audio-Visual center:

The Audio-Visual center of the college is set up for the benefits of the student community to view and learn the concepts of the engineering courses at their own pace. The Audio-visual center has a repository of e-content videos and content from various open sources available for viewers. These facilities are useful for the students to update their knowledge on fundamentals.

3. Mixing Equipment and Software

This facility helps in modifying, upgrading the scope of the content, and adding visual effects, graphical illusions to the e-content videos. The open-source software for mixing and editing is a boon for the e-content developers to make the course content, interesting and useful.

Facilities available for e-content development:

Name of the teacher	Name of the module developed	Platform on which module has been developed	Date of launching the e-content	Link to the relevant document and facility available in the institution	List of the e-content development facilities available
