SETHU INSTITUTE OF TECHNOLOGY, Kariapatti-626115 In Collaboration with THE INSTITUTION OF ENGINEERS (INDIA)  VENUE ECE-SEMINAR HALL SETHU INSTITUTE OF TECHNOLOGY	ABOUT THE INSTITUTION A twenty three years old Engineering college serving the Educationally, Economically and Industrially backward rural mass. This institute imparts technical education based on three cardinal principles: Knowledge, Service and Progress. It was established in the year 1995, offering currently 9 U.G courses and 5 PG courses out of which 5 UG courses have been accredited by NBA, New Delhi. ABOUT THE DEPARTMENT The department of Electronics and Communication Engineering was inception in the year 1997 with the objective of developing communication engineers to achieve excellence in global scenario. The department has a team of well qualified, experienced and dedicated faculty members with industrial and research background. The department has been accredited by National Board of Accreditation (NBA), New Delhi, under Tier I. It has well equipped laboratories with the state-of-the-art equipments. The department is being run with the P.G Course, M.E (Communication Systems). ABOUT THE INSTITUTION OF ENGINEERS (INDIA) The Institution of Engineers (India) or IEI is the largest multi disciplinary professional body that encompasses 15 engineering disciplines and gives engineers a global platform from which to share professional interest. IEI has membership strength of above 0.8 million. Established in 1920, with its headquarter at 8, Gokhale Road, Kolkata - 700020. IEI has served the engineering fraternity for over nine decades. In this period of time it has been inextricably linked with the history of modern-day engineering. In 1935, IEI was incorporated by
Royal Charter and remains the only professional body in India to be accorded this honor. Today, its quest for professional excellence has given it a place of pride in almost every prestigious and relevant organization across the globe. IEI functions amongst professional engineers, academicians and research workers. It provides a vast array of technical, professional and supporting services to the Government, Industries, Academia and the Engineering fraternity, operating from 122 Centres located across the country. The Institution provides grant-in-aid to its members to conduct research and development on engineering subjects. IEI conducts Section A & B Examinations in different Engineering disciplines, the successful completion of which is recognized as equivalent to Degree in appropriate field of Engineering of recognized Universities of India by the Ministry of Human Resources Development, Government of India. Every year as many as 90000 candidates appear for these exams. For details, please see: www.ieindia.org ABOUT THE SEMINAR Terahertz radiation which occupies a large portion of the electromagnetic spectrum between the infrared and microwave bands. THz radiation is non-ionizing and non-invasive, therefore safe for humans. THz exhibits an extremely low photon energy and very low emitted power leading to insignificant heating. THz waves can yield extremely high resolution images and moves vast amount of data quickly. THz research will become one of the most promising research areas in the 21st century for advances in interdisciplinary fields including Communication, imaging, security, health monitoring, medical diagnosis and textiles. Compared to the relatively well developed	science and technology at microwave and optical frequencies, basic research and advanced technological developments in the THz band are very limited and remain relatively unexplored. This seminar will create an opportunity for the researchers and academicians in exploring the latest development, practices and future trends in the THz wave. TOPICS COVERED • Introduction to Terahertz Technology • Generation and Detection Methods of Terahertz wave • Development and Future Prospects of Terahertz Technology • Applications of Terahertz Technology RESOURCE PERSONS Dr. B.
