Screenshot of the Program

The top screenshot shows a Google Meet interface with a presentation slide titled "Data and Related Definitions". The slide content is as follows:

- Data are recorded measurements, generated by humans and/or machines and stored in structured or unstructured formats.
- Measurements: numbers assigned to particular attributes or characteristic of a variable, through a standard process.
- Variables: characteristic of any entity being studied that is capable of taking on different values.
- Types of data: Categorical (category) and numerical (number or numerical indication of category)
- Levels of data: nominal, ordinal, interval and ratio
- Data/dataset formats: .csv, .xls, .txt, etc.

The bottom screenshot shows a Google Meet interface with a presentation slide titled "Data Analysis and Data Analytics". The slide content is as follows:

- Data helps in: (i) evaluating the performance, (ii) making better decisions, and (iii) improving the processes.
- Analytics is different from analysis; Analysis is exploring past events whereas analytics is exploring potential future events.

Below the text is a line graph showing a trend over four semesters. The Y-axis is labeled "Performance of Students" and ranges from 65 to 90. The X-axis is labeled "Semester" and ranges from Semester 1 to Semester 4. The graph shows a line that starts at approximately 75 in Semester 1, dips to 70 in Semester 2, rises to 80 in Semester 3, and reaches 85 in Semester 4. A label "Performance of Students" is placed near the end of the line.
