PROGRAMME REPORT
ACADEMIC YEAR
2020-2021

Department of Electrical and Electronics Engineering
PROGRAMME REPORT

Name of the Program	:	International Conference on Emerging Electrical Systems and Control
Name of the Department	:	Electrical and Electronics Engineering
Associate With	:	Institute for Engineering Research and Publication(IFERP)
Duration	:	6.05.2021to7.05.2021
No. of Participants	:	21

Department of Electrical and Electronics Engineering organized an Online Conference on the topic "Emerging Electrical System and Control" from 6.05.2021 to7.05.2021 for faculty and students. The Program was convened by Our Head of the Department Dr.A.Srinivasan and co convened by Dr.B.Meenakshi Sundaram Professor & PG Head /EEE, The Program was coordinated by Dr.K.Kanimozhi Professor/EEE, Ms.V.S.Chitra Assistant Professor/EEE,Ms.V.Vaishnavi Assistant Professor/EEE and Ms.R.S.Bharathi Assistant Professor/EEE. In this conference the speech related to "Emerging Electrical System and Control" was presented by Dr.RaziqYaqub Assistant Professor Alabama A&M University Graduate School Huntsville, Alambama, USA and Dr.D.P.Kothari Director Research and Professor, S.B.Jain Institute of Management, Research and Development, Nagpur.

PROGRAMME REPORT

Name of the Program	:	An Efficient Control Method for On-board Bidirectional Converter in Electric Vehicle
Name of the Department	:	Electrical and Electronics Engineering
Duration	:	13.01.2021
No. of Participants	:	21

A Webinar on "An Efficient Control Method for On-board Bidirectional Converter in Electric Vehicle" was organized by Dept. of EEE on 13.01.2021 for students, Internal faculty and external participants. The resource person was Dr.Ir.Krismadinata, Professor, Faculty of Engineering UniversitasNegeri Padang, Indonesia. He delivered a lecture on An Efficient Control Method for On-board Bidirectional Converter in Electric Vehicle. Dr.A.SrinivasanHod/EEE welcomed the gathering , followed by the lecture. The following is the abstract of his presentation.

He discussed on his project that represents an alternative energy storage system in the drive line of a hybrid electric vehicle.

• The effect of the use of aSupercapacitors as a power buffer to smooth rapid power fluctuations in and out of the batteries of a hybrid electric heavy vehicle is investigated.

• In this work a topology is presented where the performances of a battery pack in parallel with supercapacitors are evaluated in terms of stress and extending battery lifespan.

• According to this association the battery current drawn is reduced and the supercapacitor source supplies the majority of transient current and as a result the battery stress is reduced up to 30 %.

Finally, students gave their valuable feedback and vote of thanks.
